## HRTPO Project Priorities For FDOT Tentative Work Program Fiscal Years 2025/26 to 2029/30

Public participation is solicited without regard to race, color, national origin, sex, age, disability, religion or family status. Persons requiring accommodation under the Americans with Disabilities Act (ADA) or language translation, free of charge should contact Marybeth Soderstrom, HRTPO Title VI Liaison, 863-534-7130 (voice), or via Florida Relay Service 711, or by emailing [msoderstrom@cfrpc.org](mailto:msoderstrom@cfrpc.org) at least three days prior to the event. The HRTPO strives to ensure full and fair participation by all potentially affected individuals, groups and communities in the transportation decision-making process.

The preparation of this document has been financed in part through a grant from the U.S. Department of Transportation (Federal Highway Administration) in cooperation with the Florida Department of Transportation, the urbanized area of Highlands County including the cities of Sebring and Avon Park; and the counties of DeSoto, Glades, Hardee, Hendry, Highlands and Okeechobee.

# Introduction

As the lead transportation planning agency in the Heartland region, the HRTPO is responsible for developing a list of priority projects and submitting the list to the Florida Department of Transportation (FDOT) for consideration during the development of FDOT's Five Year Work Program. It is critical to the project prioritization process that projects being considered for funding are evaluated based on criteria that reflect the HRTPO's vision and mission, as well as adopted goals, objectives, and targets of the Long-Range Transportation Plan (LRTP).

Each year, member governments of the HRTPO are invited to submit Transportation Project Applications and Priorities to the HRTPO for transmittal to the Florida Department of Transportation (FDOT) for consideration of programming and funding by FDOT. Project applications are scored based on criteria developed by the Technical Advisory Committee and Citizens Advisory Committee adopted by the HRTPO Board and ranked in order of priority.

Projects that are funded in the FDOT Five Year Work Program are then identified as part of the Transportation Improvement Program for the next year.

## Project Application

- **Prioritization Policy in Case of Ranking Tie | Adopted May 25, 2016**

Total project cost will be used as additional criteria to prioritize projects with the same ranking. Lower-cost projects will be given higher priority, and higher-cost projects will be given lower priority.

## 2024 Process for Submission of Priorities

<b>March 31, 2024</b>	All projects due to FDOT GAP
<b>April 2024</b>	Preliminary score review by local jurisdiction of TA and CM projects
<b>May 2024</b>	Ranking endorsement by TAC and CAC
<b>June 19, 2024</b>	Priority List Adoption by HRTPO
<b>July 1, 2024</b>	A ranked package of final adopted/approved priority projects must be transmitted to FDOT by July 1, 2024. At that time, further consideration for programming and funding will be evaluated as the Tentative Five-Year Work Program is developed over the summer/fall time frame.

## Transportation Alternatives (TA)

Transportation Alternative (TA) projects encompass a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, recreational trails, safe routes to school projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

## Congestion Management (CM) Projects

Congestion management projects improve traffic operations and safety by using strategies to reduce travel demand or implement operational improvements. They typically improve travel conditions through the use of low-cost improvements or strategies, which can be implemented in a relatively short timeframe (within 5 – 10 years) compared to more traditional capacity improvements, such as adding travel lanes.

## Capacity Projects

Highway Capacity projects are often associated with major construction projects, such as building a new highway where none existed before, bypassing an existing route, or adding one or more lanes to an existing facility. These projects are identified in the region's adopted Long Range Transportation Plan.
